Education

UNIVERSITY OF SHEFFIELD [2024 – 2028]

- Studying an MEng in Materials Science and Engineering
- First Year: 84%, Predicted 1st Class
- Recipient of the Materials Science and Engineering Prize for Exam Performance
- Charity Secretary for the University Squash Club

ST BENEDICT'S SCHOOL, EALING [2017 – 2024]

- A Levels: Mathematics (A*), Physics (A*), Chemistry (A), Further Mathematics (B)
- 10 GCSEs (grades 8-9) including Mathematics (9)

Experience

TECHNICAL CLERK – AZEDINHA LTD. [AUGUST – SEPTEMBER 2025]

- Adapted existing go-by specifications for use in a sustainable aviation fuel project.
- Created templates for mechanical equipment datasheets and schedules.
 - Proficient in Microsoft Office Suite

WORK EXPERIENCE – TECHNIP ENERGIES [AUGUST 2025]

- Produced technical reports detailing materials selection in mitigating organic acid corrosion in steels.
- Examined flue gas corrosion mechanisms involving acid dew points and chloride contaminants, compiling a technical report on steel alloy use in flue gas desulphurisation systems.

WORK EXPERIENCE – ELLIOTT WOOD [AUGUST 2024]

- Established an understanding of initial planning in engineering projects, by writing a desk study on the environmental conditions of a potential site.
- Assembled a carbon dioxide emissions report on structural materials, informing on the importance of prioritising sustainable sourcing and design.

WORK EXPERIENCE – TECHNIP ENERGIES [JULY 2023]

- Gained an awareness of the basics of corrosion mechanisms and the importance of materials selection in preventing corrosion and contamination in a system.
- Independent exercise selecting the correct materials for a use in high temperature hydrogen conditions, using heat/material tables and documentation from the American Petroleum Institute.

Projects

SUNBYTE BALLOON TELESCOPE – SCIENCE AND OPTICS TEAM LEAD

- Managing a team, tracking project deadlines and ensuring that each team member is up to date on their deliverables – assigning tasks and integrating individual deliverables into the whole system.
- Design and production of a visible-light spectrometer from scratch.
- Used a limited budget to procure parts for the telescope, completing purchase forms.
- Responsible for the software used to produce scientific data, and that converts raw spectrometer data into an electromagnetic spectrum.
 - Proficient in Python, MATLAB

ACHIEVEMENTS

- Duke of Edinburgh: Bronze, Silver, Gold

CV session notes

Personal Statement at the beginning: detail your current position and/or career goals, strengths and what you can offer.

Mention skills like teamwork, problem solving and communication as this can be gained in and out of the workplace.

Interviews:

Be prepared: 2 way process, a way to find out about the employer, ensure they're right for you.

Prepare some questions!!! – shows you're genuinely interested.

Cyberstalk the company on linkedin

Especially your interviewers!!!

Identify your strengths and weaknesses – think about how you can **bring value** to the organisation.

STAR method:

Situation

1. Set the scene for the interviewer concisely. Avoid unnecessary details. Help the interviewer understand your answer.

Task

1. Clarify your core involvement and help the interviewer understand your role.

Action

1. Explain specific steps you took to achieve the goal or solve the problem.

Result

1. Highlight the outcome of your actions and emphasise the positive results achieved – put a positive spin on it!

Strong examples of projects/tasks conducted – gear them towards most questions.

Great examples of questions: (stuff that HR likes)

- **What does a typical day look like in this role?**
- How do you think the company defines and demonstrates its values?
- How would you describe the company's culture?

Just ask! – for interview dress code.

Cover Letter – make it specific for that role!!

Follow up! – after the interview (leave it for a day or so), then send an email thanking the interviewer.
